Total	20	41	22	607	690
Percentage	2.9%	5.9%	3.2%	88.0%	100.0%

Explanatory notes:

Client source:	This represents the person that referred the client to Community Agents. The "other" category includes other community and voluntary sector organisations and self referrals as a result of promotional materials.
Age profile:	This is recorded at the first enquiry/visit. Date of birth (DOB) is a mandatory field but this was introduced part way through year one so the early data may not include a clients age. In some circumstances the client is unwilling or unable to provide a DOB.
Client type:	All clients are assumed to be a "cared for" person unless otherwise established that they are a "carer" or "both" (a carer and cared for person). However some clients do not consider themselves to be either a carer or cared for person so these are recorded as "Neither".
Housing:	This is not a mandatory field for data collection but the agents are now being encouraged to routinely collect this information.
Cases:	This represents the latest status for all cases created within the time period. Some cases are still ongoing and hence "Still open". A case showing as "new" has for some reason not been started yet.
Presenting needs:	These are the individual presenting needs. A single case will often contain multiple presenting needs.
Closed case goals:	This is an assessment of the goals set by clients at the close of the case. It should be noted that the goals set by some clients are not necessarily achievable in the short term and there may be an element of under reporting which would by default show as "No progress".
